

Feature Database API Admin Matrix

Generated: January 1, 2026

Last Updated: January 1, 2026 (Post-Schema Migration)

Purpose: Track all features, their database backing, API endpoints, and admin functionality

Summary of Fixes Applied

- ✅ **Admin Dashboard Stats** - Fixed to use `InvProduct`, `InvCategory`, `InvBrand`
- ✅ **Content API Path Alignment** - Added route aliases for banners and landing pages
- ✅ **Cart System** - Updated to use `InvProduct` lookups (productId changed to Int)
- ✅ **Seed Data** - Admin users created (`admin@solo-ecommerce.com`, `aiman@solo-ecommerce.com`)
- ✅ **Prisma Schema** - Removed obsolete `Product` model, updated FK references

Legend

Status	Meaning
✅ OK	Feature fully working end-to-end
⚡ Broken Wiring	Frontend/Backend path mismatch or wrong schema
❌ Missing API	Backend endpoint doesn't exist
❌ Missing DB	Database table/fields missing
🔧 Broken UI	Frontend UI issues
🔒 Broken Auth	Authentication/authorization issues
📌 TODO	Intentionally not implemented

3. TOP 10 BROKEN FEATURES (Priority Order)

#	Feature	Issue Type	Root Cause	Fix Required
1	Admin Dashboard Stats	 Broken Wiring	admin.service.ts uses prisma.product/category/brand which reference deleted public.* tables	Change to prisma.invProduct/invCategory/invBrand
2	Cart System	 Broken Wiring	cart_items.productId FK pointed to deleted public.products	Update Prisma schema, store inventory product ID as TEXT
3	Admin Banners CRUD	 Broken Wiring	Frontend calls /content/banners/*, backend has /content/admin/banners/*	Fix frontend paths OR add backend aliases
4	Admin Landing Pages CRUD	 Broken Wiring	Frontend calls /content/pages/*, backend has /content/admin/pages/*	Fix frontend paths OR add backend aliases
5	Product Create/Edit	 Broken Wiring	No aggregate DTO - can't create full product with pricing/images/specs in one call	Create aggregate endpoint in admin
6	Order Creation	 Missing API	No POST /orders endpoint for checkout	Implement orders controller/service
7	Order Admin Detail/Status	 Missing API	No endpoints for viewing/updating order details	Implement in admin controller
8	Category Reorder	 Missing API	No PATCH /categories/reorder endpoint	Implement reorder endpoint
9	Favorites	 Missing DB	No favorites table - using local storage only	Add public.favorites table
10	Promo Codes Admin	 Missing API	No CRUD endpoints for promo codes	Implement promos controller

4. FIX IMPLEMENTATION PLAN

Phase 1: Critical Fixes (Unblock Dashboard & Cart)

1. Fix admin.service.ts to use inventory schema models
2. Update Prisma schema for cart to reference inventory products

Phase 2: API Path Alignment (Unblock Admin CMS)

3. Fix frontend content_api.dart paths OR add backend route aliases

Phase 3: Complete CRUD

4. Implement product aggregate create/update endpoint
5. Implement orders CRUD
6. Implement promo codes CRUD

Phase 4: Enhancements

7. Add category reorder endpoint
8. Add favorites table and endpoints
9. Add content blocks for static pages

5. COMMITS LOG

Commit	Description	Status
(pending)	Fix admin.service.ts to use inventory schema	
(pending)	Fix cart system for inventory products	
(pending)	Fix content API paths alignment	
(pending)	Implement product aggregate CRUD	
(pending)	Implement orders endpoints
