

Solo E-Commerce — Documentation Index

Single source of truth. This is the canonical, current documentation set for the Solo E-Commerce platform. Older standalone docs at the repo root remain for historical context but are superseded by the documents in this folder. Date: May 2026.

Audience map

If you are...	Start here
New engineer	01 Scope & Vision → 03 High-Level Design
Backend engineer	04 Low-Level Design → 06 API Reference
Frontend engineer	07 Frontend Architecture
DBA / data engineer	05 Database & ER Diagram
SRE / DevOps	09 Deployment & Operations
Security reviewer	08 Security & Compliance
QA / test engineer	10 Testing & QA
Product / business	01 Scope & Vision → 02 Functional Spec

Document set

1. [Scope & Vision](#) — business context, goals, personas, non-goals
2. [Functional Specification](#) — user-facing features and flows
3. [High-Level Design](#) — system architecture, components, data flow
4. [Low-Level Design](#) — module-level design of each backend domain
5. [Database & ER Diagram](#) — schema, entities, relationships, indexes
6. [API Reference](#) — REST endpoint catalogue grouped by controller
7. [Frontend Architecture](#) — React + Vite SPA layout, state, routing
8. [Security & Compliance](#) — auth, RBAC, OWASP posture, secrets
9. [Deployment & Operations](#) — Azure topology, CI/CD, runbooks
10. [Testing & QA](#) — test pyramid, smoke, unit, E2E, coverage matrix

Quick reference

Item	Value
Backend (live)	<code>https://backend-qlyb5greec2io.whiteriver-ae956411.eastus2.azurecontainerapps.io</code>
Frontend (live)	<code>https://agreeable-field-0fa189b0f.7.azurestaticapps.net/</code>
Region	<code>eastus2</code>
Azure RG	<code>rg-Solo-Website</code>
Backend stack	NestJS 10 · Prisma 5 · PostgreSQL 14 · Node 20
Frontend stack	React 19 · Vite 6 · TypeScript 5 · Zustand 5 · React-Router 7
Hosting	Azure Container Apps (backend) · Azure Static Web Apps (frontend)
Database	Azure Database for PostgreSQL Flexible Server
Object storage	Azure Blob Storage (<code>media</code> container)
Payments	Stripe (cards) · Tabby · Tamara (BNPL)
Currency	AED (UAE Dirham) — VAT 5%
IaC	Bicep (infra/main.bicep)
Orchestration	<code>azd</code> (Azure Developer CLI)

Conventions used in this docs set

- All API paths are shown with the global `/api` prefix.
- Code references use repo-relative paths.
- Diagrams are Mermaid so they render in GitHub / VS Code.
- `[deferred]` , `[planned]` , `[deprecated]` tags flag forward-looking items.
